

IN THE CLAIMS:

1 1. (Previously Amended) A method of making an identification tag for a wire rope
2 termination which method comprises:
3 swaging a wire rope termination sleeve to a wire rope;
4 applying adhesive to a surface of said sleeve;
5 thereafter positioning a tag having identifying information over said sleeve so that
6 said tag is adhesively secured to said sleeve; and
7 thereafter encasing said tag by injection molding of a transparent material over said
8 tag.

1 2. (Canceled)

1 3. (Original) A method of making an identification tag as set forth in Claim 1 wherein
2 said step of encasing said tag with a transparent material is accomplished by molding a clear plastic
3 cover over said tag.

1 4. (Canceled)

1 5. (Canceled)
